

Senayan Library Management System – SLiMS

সেনায়ান লাইব্রেরি ম্যানেজমেন্ট সিস্টেম – স্লিমস্

Senayan Library Management System (SLiMS) is Open Source Integrated Library Management Software originally developed in Indonesia with a variety of developers from the different parts of the world including Bangladesh. Most of the developers are library professionals which makes the requirements well understood and leads to develop a user- friendly software. The software was awarded in the category of Open Source in Indonesian ICT Award - 2009. There is a Country Co-ordinator for SLiMS in Bangladesh who works with the SLiMS Developers Community (SDC). Bangla interface is incorporated with the system. SLiMS is developed with different International Standards & Unicode compatibility and it completely supports Bangla input & Bangla searching. On the other hand, it has built- in feature of Digital Library and Institutional Repository feature. As a result, SLiMS alone can meet your every requirements in Library Automation and Digitization.

The salient features of SLiMS are as follows:

- **A complete library management** software
